

**DIGITAL
TRUST
WORLD**

Boston | Virtual | Europe

Expand Your Knowledge. Advance Digital Trust.

Digital trust is more important than ever.

As an IS/IT professional, you carry the responsibility of creating, maintaining and advancing a more trustworthy digital world. Whether you monitor data as an auditor, check accountability in governance or assess risks as a privacy pro, digital trust is at the core of what you do. Join us at ISACA® Digital Trust World to learn the tools and techniques that will help you create a safer digital space. [**Learn more about Digital Trust >**](#)

Digital Trust World Boston, 9–11 May 2023
(Formerly ISACA Conference North America)

Be ready for tomorrow's digital world. Today.

Gain relevant insights. Expand your thinking. Acquire the knowledge to help build a safer digital space for all. Digital Trust World brings together the brightest minds in digital trust, skill-building workshops, engaging sessions, inspiring speakers, valuable CPE credits and countless networking opportunities.

Expand your thinking

Attend extensive workshops and sessions covering insights, trends and best practices relevant to digital trust and your IS/IT field.

Forge new relationships

Meet and connect with experts and industry thought leaders across digital trust, audit, governance, risk, privacy, cybersecurity and emerging technologies.

Find your inspiration

Hear some of the most recognized names in the digital world today share insights on how professionals can be better prepared for tomorrow.

Earn CPEs

Digital Trust World enables you to earn valuable CPE credits toward maintaining your ISACA certifications.

Meet our Digital Trust Boston keynote speakers

Explore the future of quantum computing

Dr. Michio Kaku is one of the world's preeminent Theoretical Physicists and popular science communicators. Join him as he examines how AI and quantum computing will fundamentally change our way of life in his opening keynote address.

Know the true impact of digital trust

Algorithmic Product Engineer, Facebook Whistleblower and Closing Keynote Frances Haugen will discuss the human impact of digital trust and its critical importance to data privacy and decision-making.
